

**K**amio® Ring-Lights provide a glamour lighting solution for close-ups in film and video photography. The soft, cool Kamio light falls gracefully on the subject's face because it mounts on the lens, unlike conventional on-camera quartz lights that produce heat and shadows. Kamios also display daylight and tungsten quality light without filtration.

### The Kamio 6 System

- Kamio 6 Fixture
- 2-stage clip-on matte box
- 12VDC Dimming Ballast
- True Match® daylight and tungsten lamps
