News Release

Kino Flo® adds to its True Match® line of hi-color rendering lamps to its Mini-Flo® & Desk-Lite series.

The new [T5 KF32](#) tungsten balanced lamp joins the KF55 in the [Mini-Flo](#) & [Desk-Lite](#) family. The KF32's color (CRI 95) has been specially formulated by Kino Flo to match the spectral sensitivity curves of HD and digital film imaging equipment. Like other lamps in the True Match family, the KF32 is soft, energy efficient and cool to the touch. The KF32 works side by side on the set with traditional tungsten sources without corrective filtration. The KF32 replaces the 9" and 12" KF29. See our [True Match](#) lamps section for more information.
