**New! Celeb® 201 Dmx LED**

**Burbank, CA** – Kino Flo's Celeb® 201 LED features tunable Kelvin from 2700 to 6500K and DMX wireless link capability.

The new **Celeb® 201 DMX** boasts technical innovations that make it an ideal imaging tool: dial-in white light from 2700 to 6500 Kelvin and presets with programmable settings; full range manual and DMX dimming without flicker or color shift. Light levels do not change when selecting Kelvin settings. With a Lumen Radio transmitter, the Celeb 201 can operate DMX wirelessly.

As with all Kino Flos, the Celeb performs color beautifully with True Match® light quality (CRI 95). With its low energy profile, the slim DMX fixture operates on Universal Input 100-240VAC or 24VDC and needs less than one amp at 120VAC to produce more lumens than a 750W tungsten softlight.

The Celeb 201 comes complete with molded accessory holders, removable gel frame and 90° honeycomb louver. A 60° honeycomb louver is also available as an accessory. The Celeb 201 will be available September 1st, 2015 as a fixture and center mount kit.

Key features are:

- Kelvin presets and custom settings between 2700K-6500K
- Kino Flo True Match® color and light quality (CRI 95)
- Universal input 100VAC-240VAC or 24VDC
- Onboard and DMX dimming w/ Auto Terminate
- DMX wireless link (Lumen Radio)
- Flicker-free, dead quiet operation
- Center Mount, Yoke Mount and Pole-Op
