## **Celeb 400 DMX Wins Best of Show at NAB 2014**

LAS VEGAS – Kino Flo rakes in another NAB Best of Show for its production lighting softlights. This year’s award, from [Videomaker](#), goes to the new [Celeb® 400 DMX](#) studio and location LED, the only color variable glamour light to ride the spectral sensitivity curves of the best HD and film cameras.

The new Celeb 400 is the big brother to last year’s NAB *Star Award (TV Technology)* for the [Celeb® 200 DMX](#) LED beauty light that won accolades from the judges for its “superior technology.” *Videomaker* announced their Best of NAB 2014 awards during the trade show in Las Vegas and through their on-line news site, touting the [Celeb® 400 DMX’s](#) “continued excellence” and “impressive...full dimming and color temperature controls.”

The **Celeb 400 DMX LED** is one of the largest LED soft lights available in the market today measuring 45” x 14” (114.5cm x 36cm). Similar in size to the award-winning 4ft 4Bank, the Celeb produces a soft, broad wraparound light quality (CRI 95) and produces color faithfully, beautifully on HD or film, in the studio or on location. The Celeb features dial-in white light from 2700-5500K and emits more lumens than a 1K tungsten softlight, yet uses only 1.8A (120VAC) compared to a tungsten softlight at 8.3A.
