New! Diva-Lite LED 20/30 Dmx

Burbank, CA – Kino Flo Lighting Systems' new Diva-Lite LED 20 & 30 DMX feature tunable Kelvin from 2700 to 6500K, with Green/Magenta correction, and wireless DMX.

From software to hardware, the Diva-Lite LED lighting systems are re-shaping the future of cinema and television production with lustrous white light that doesn't flicker or shift color temperature when dimmed. The Diva-Lite LED 20 and 30 can be operated wirelessly, with the use of a Lumen Radio® transmitter, as an alternative to DMX cables.

Kino Flo has further refined the Diva-Lite LED's with variable green-magenta settings. Hues can be balanced to other lights on the set and tuned to match the spectral curves of professional digital cameras.

Diva-Lite LED's display True Match® quality soft light (CRI 95), operating on universal input from 100VAC to 240VAC, or 24VDC.

The lights come with a 90° honeycomb louver. A 60° honeycomb louver is also available as an accessory. Diva-Lite LED's arrive on dealer shelves in November 2016. Diva-Lite LED kits will be available as a one-light kit with soft case or flight case and a two-light kit (Diva-Lite LED 20) with flight case.

Key features are:

- Kelvin presets and custom settings between 2700K-6500K
- Universal input 100VAC-240VAC or 24VDC
- Manual and DMX dimming w/ Auto Terminate
- DMX wireless link (Lumen Radio)
- Green/Magenta control
- Flicker-free, dead quiet operation
- Built-in Barndoors, Honeycomb Louver
- Center Mount
