Press Release

New! BarFly 450 model features DMX control

Burbank, CA, August 28, 2013 – Kino Flo Lighting Systems is pleased to announce the BarFly 450 with DMX control to be available September 15, 2013.

The **BarFly® 450** replaces model BarFly 400D. The 450 features DMX and manual dimming, DMX and manual lamp switching, remote dimming and universal input voltage (100VAC-240VAC).

A new **Auto Terminate** feature takes the guesswork out of having to “close” or “terminate” the last fixture in the DMX chain.

The all-in-one BarFly 450 DMX system includes a built-in reflector, removable gel frame, 90° honeycomb louver and center mount. The BarFly 450 will be available as a fixture and kit with clamshell case.

Its smaller sibling, BarFly 200D, will remain as a non-DMX model.

###

Located in Burbank, CA, Kino Flo Lighting Systems was founded in 1987 and is a manufacturer of high quality soft lighting equipment for use in motion picture lighting, TV broadcast, video and photography industries. In 1995 Kino Flo received a technical achievement award from the Academy of Motion Picture Arts and Sciences for the development of color-correct lamps for film.
