Celeb® receives TV Technology STAR award at NAB 2013

Las Vegas – Kino Flo's **Celeb® LED** took center stage at the NAB 2013 show and was a recipient of the prestigious TV Technology's STAR award.

Kino Flo's new **Celeb® 400 and 200 DMX** boasts technical innovations that make it an ideal imaging tool: dial-in white light from 2700 to 5500 Kelvin and presets with programmable settings; full range manual and DMX dimming without flicker or color shift. Light levels do not change when selecting Kelvin settings.

As with all Kino Flos, the Celeb performs color beautifully with True Match® color-correct light quality (CRI 95). With its low energy profile, the slim DMX fixture operates at Universal Input 100-240VAC and needs only 1.9A at 120VAC (Celeb 400) to produce more lumens than a 1K softlight.

Both models come in Center Mount, Yoke Mount and Pole-Op options. The Celeb 200 is available now and the Celeb 400 will be available in October 2013.

Key features are:

- Kelvin presets and custom settings between 2700K-5500K
- Kino Flo True Match® color and light quality (CRI 95)
- Universal input 100VAC-240VAC
- Onboard and DMX dimming
- Flicker-free, dead quiet operation
- Center Mount, Yoke Mount and Pole-Op
