News Release

## **New! Tegra™ 4Bank**

HOLLYWOOD – Kino Flo® Lighting Systems' new *Tegra 4Bank* dimming softlight stole the show at the Cine Gear motion picture and television production exhibition at Paramount Studios this weekend.

A hit with cinematographers and lighting technicians, the Tegra 4Bank combines the soft, glamour light quality of the award-winning Kino Flo 4Bank System with the dimming and power savings of the best-selling Diva-Lite® fixture.

Features include onboard dimming and switching, remote dimming, universal input voltage, power factor correction, plus Kino Flo's new 180 degree integrated barndoors with newly designed hinge and honeycomb louver.

The Tegra 4Bank produces as much light as a 1000W tungsten softlight using only one tenth the amount of power, yet operates high output, flicker-free and dead quiet. The Tegra 4Bank includes a center mount system ideal for rigging in tight locations or on a light stand. The fixture takes 2900K, 3200K and 5500K (CRI95) True Match® lamps that display a full range of high color rendering soft light.

Key features are:

- Remote dimming
- Onboard dimming
- Onboard switching
- Universal input 100-240VAC
- Newly designed hinged Barndoors, Reflector and Honeycomb Louver
- Center Mount
- Low amperage (2.8A, 120VAC and 1.4A, 230VAC)
- High output, flicker-free, dead quiet
- Kino Flo True Match® 2900K, 3200K and 5500K color temperature
