for HD Cinematography

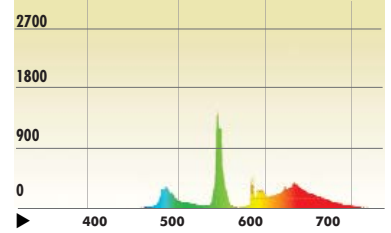

# True Match® 55W Compact Lamps

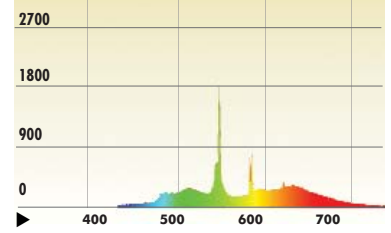

## True Match® Lamp Spectral Charts

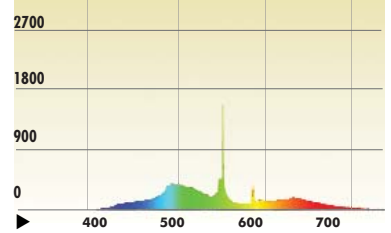

### KF29®

### KF32®

### KF55®

**K**ino Flo® debuts the first hi-lumen, hi-color rendering KF32 compact for its award winning True Match® line of professional cool lights. The new tungsten-balanced KF32 takes center stage with the KF29 and KF55 broad spectrum CFL's and expands the creative palate for cinematic HD and filmmaking.

Like other lamps in the True Match family, the new KF32's color (CRI 95) is formulated by Kino Flo to match the spectral sensitivity curves of HD and digital film imaging equipment. With its proprietary chemistry, the new KF32 in a Kino Flo fixture displays a unique quality of soft light. The smooth beam gradient responds especially well to the new generation of HD cameras on the set. The KF32 compact works side by side with traditional tungsten sources without corrective filtration, and draws one tenth the power per lumen compared with hot lights.
