KF21 Battery **28VDC**

Block/KF21 Battery

Kino Flo Lighting Systems partners with **BlockBattery®** for newly introduced **KF21** (NiMH) battery systems for its LED line. The Kino Flo/BlockBattery systems are designed to work with the following Kino Flo LED products with DC capability:

- Celeb 250 LED DMX
- Diva-Lite 20 & 30 LED DMX
- FreeStyle 21 & 31 LED DMX
- Select 20 & 30 LED DMX

The **KF21** battery can power 28.8V (20-34VDC) applications. Run time for Kino Flo products listed above is approximately 1 hour and 10 minutes at full brightness. When fixtures are dimmed, the battery will last longer.

Charge time is only 1.5 hours versus Lithium batteries that take approximately 4 hours to fully charge. Unlike lithium batteries, the Kino Flo/BlockBattery is also travel friendly with no travel restrictions.

In addition to powering 28.8V, battery adapters for V-Lock or AB/Gold mount may be used to access 14.4V. It's like having two batteries for the price of one!

Features include:

- KF21 battery powers 28.8V (20-34VDC)
- Travel friendly, no travel restrictions
- Quick charge time, 1.5 hours
- Mafer Mount and Baby Mount available with 28.8V, 3-Pin xlr
- Battery Adapter V-Mount (14.4V)
- Battery Adapter AB/Gold Mount (14.4V)
