FreeStyle Mini LED Kit

Kit-F10BU
FreeStyle Mini LED Kit, Univ

FreeStyle Mini LED Kit consists of:
1 FreeStyle Mini Fixture
1 Mounting Plate
1 Extension Cable
1 LED Controller
1 Soft Case

FreeStyle Mini Kit Components

CFX-F10  FreeStyle Mini LED Fixture

MTP-BG41S  KinoGrip 41K Mount w/ Baby Receiver Short (16mm)

X08-F125  FreeStyle/1 Extension, 25ft

LED-120X-120U  FreeStyle 120 LED DMX Controller, Univ 120U

LED-120X-230U  FreeStyle 120 LED DMX Controller, Univ 230U

BAG-FS10  FreeStyle Mini System Soft Case
FreeStyle T41/T21 LED Systems

SYS-FT41U
FreeStyle T41 LED DMX System, Univ

SYS-FT21U
FreeStyle T21 LED DMX System, Univ

FreeStyle T41 or T21 LED System consists of:
1 FreeStyle T41 or T21 Fixture
1 FreeStyle 4ft (or 2ft) LED Tube
1 Mounting Plate
1 Extension Cable
1 LED Controller

FreeStyle T41/T21 System Components

CFX-F481 FreeStyle T41 Fixture
CFX-F241 FreeStyle T21 Fixture

FS-48 FreeStyle 4ft LED Tube
FS-24 FreeStyle 2ft LED Tube

MTP-KG41 KinoGrip 41K Mount w/ 3/8" Pin (10mm)

X08-F125 FreeStyle/1 Extension, 25ft

LED-120X-120U
FreeStyle 120 LED DMX Controller, Univ 120U

LED-120X-230U
FreeStyle 120 LED DMX Controller, Univ 230U
Power

AC Input
The FreeStyle 120 LED DMX Controller is powered AC and includes an IEC connection. It also includes a 12ft power cord with a locking IEC connector.

The FreeStyle 120 LED DMX has a built-in power supply with universal input from 100-240VAC.

Ambient Operating Temperature
The FreeStyle 120 LED DMX is designed to operate at temperatures from 14°F to 104°F (-10°C to 40°C).

DC Input
The FreeStyle 120 LED DMX can also be operated on 24VDC (input range 18-36VDC) through a 3-Pin XLR.

The pin polarity is:
Pin # 1 – Ground
Pin # 2 + 18-36VDC
Pin # 3 not used

Note:
A low voltage warning will display if input DC voltage is under 18VDC.
Photo example: LOW VDC: 16
FreeStyle Mini Fixture Assembly

The FreeStyle Mini is comprised of an LED Panel and Louver. The Louver is held in place with Velcro Fasteners.

FreeStyle T41/T21 Fixture Assembly

The FreeStyle T41/T21 fixtures are comprised of a Louver and Reflector.

The Louver and Reflector are held in place with Velcro fasteners.

The FreeStyle Reflector has a unique design to accommodate the aluminum channel on the back of the FreeStyle tube. It provides even light distribution and maximizes light output. In addition, it acts as a heatsink and allows the FreeStyle Tubes to run cooler.

Insert tube into the fixture’s tube holder clips. The tube can operate remotely from the fixture allowing them to be built into sets or custom soft boxes or handheld as a single tube for an eye-light.
The FreeStyle T41, T21 and Mini LED fixtures can operate remotely from the controller with extension cable up to 50ft (2 x 25ft).

**X08-F125**  FreeStyle/1 Extension, 25ft

### FreeStyle T41/T21
The extension cable connects directly to the LED tube. Align arrows on extension cable connector with tube. Push and click into place. To remove, turn locking ring to the left and pull.

### FreeStyle Mini/LED 120X Controller
To connect the extension cable to the FreeStyle Mini or LED 120X controller, align arrows on extension cable with connector. Push and click into place. To remove, turn locking ring to the left and pull.
Mounting Controller

The Controller can be mounted to a stand with a ballast mount accessory, MTP-BAL1 and mafer clamp.
Mounting the Fixture

The FreeStyle fixtures have a universal mount. The ball and socket mount allows the fixture to be oriented in a broad range of angles.

Align the center pin of the mounting plate to the center hole on the mating plate.

Rotate plate clockwise until the four shoulder rivets drop into the receptacle. A locking pin will snap into place when the plate is properly seated.

The **yellow wire loops** (FreeStyle T41/21) provide attachment points for a safety chain.

To remove the plate, pull up on the locking pin and reverse the mounting procedure.

Turn the knob to loosen or tighten the mount.

Lollipops are interchangeable.

- **MTP-L**  Kino 41 Lollipop w/ 3/8" Pin (10mm)
- **MTP-LBC**  Kino 41 Lollipop w/ Baby Receiver Curve (16mm)
- **MTP-LBS**  Kino 41 Lollipop w/ Baby Receiver Short (16mm)
Applying Louver

The Louver is fastened to the FreeStyle T41/T21 fixture with 4 Velcro straps.

The FreeStyle Mini Louver is also fastened to the fixture with 4 Velcro Straps.
The SnapBag accessory (DFS-FS10-S) is a lightweight fabric tailor-made for the FreeStyle Mini LED. It slips over the fixture and is attached with straps. The reflective material intensifies the soft light. The removable grid cloth attaches to the inside with Velcro.

The 40° SnapGrid accessory (LVR-FS140-S) is constructed of pre-stretched fireproof fabric with a built-in stainless steel frame. It unfolds and snaps into place. This model requires the use with the corresponding SnapBag; it is not designed to be used by itself.
Mounting LED Tubes

FreeStyle LED Tubes can operate inside the fixture or independently with only the wiring harness. The LED Tubes have an aluminum rail that can be used as an access point for mounting accessories:

- **MTP-F100** FreeStyle Tube Mount – Anchor
- **MTP-F101** FreeStyle Tube Mount – Baby Pin
- **MTP-F102** FreeStyle Tube Mount – Wall Plate
- **MTP-F103** FreeStyle Tube Mount – Hanging Kit 4pk (Wire not included)
- **MTP-F103W** FreeStyle Tube Mount – Hanging Wire, 50ft
- **MTP-F105** FreeStyle Tube Mount – Combiner
- **MTP-F200** FreeStyle Tube -Ball Mount
- **MTP-F201** FreeStyle Tube - Floor Stand

Insert into T-slot. Insert wire all the way down. Pull up wire until it latches. Press down pin to release wire.

The FreeStyle Tube Mount Combiner (**MTP-F105**) can mount two LED tubes. Insert into T-slot and tighten thumbscrew. Several Combiners can be combined for custom rigging applications.
The FreeStyle Tube Ball Mount (MTP-F200) includes a baby receiver and works together with the FreeStyle Tube Floor Stand (MTP-F201) which includes a baby pin.

The FreeStyle Tube Ball Mount (MTP-F200) can also be used in conjunction with a baby pipe clamp.
A) **On /Off:** *On* = Green light displayed. *Off* = Red light displayed. The display and all menu settings can be operated while the power button is in the Off position, as long as power is applied to the controller. The On /Off button only controls the light source.

B) **Menu:** Provides access to menu options such as General settings, Reset, DMX, DMX Wireless, Camera LUT and Color Space. Shortcut: While on control screen, press and hold for 3 seconds to switch through menus (White, Gels & Hue, RGB, CIE xy and FX).

C) **Preset Buttons:** Factory defaults left to right are: 2700K, 3200K, 5000K and 6500K. G/M default value is 000. User can also use these preset buttons to store custom Kelvin and G/M settings.

D) **Display:** Provides access to Dim, Kelvin, G/M, and DMX channel. Factory reset will show: Dim = 10%, Kelvin = 2700K, G/M = 000, DMX = 001.

E) **Lock:** Press the Lock button to disable all buttons and Control knob. Press for 3 seconds to restore displayed presets to default factory settings.

F) **Mode:** Press to navigate from Dim to Kelvin and G/M settings. When in sub-menus, pressing Mode always returns you to main display. When DMX is applied, use Mode to access DMX channel on main display. Shortcut: Long press will bring you back one step.

G) **Data Port:** Mini B USB for firmware updates.

H) **Control Knob:** Manually adjusts Dim, Kelvin, G/M levels and DMX address. Press the Control knob to toggle between Fine and Coarse increments or when selecting options within menus.

**DMX Note:** The LED-120X has an “AUTO TERMINATE” feature. The last fixture that does not have an XLR cable attached to the DMX “Out” port will automatically terminate.
Control Panel - Gels/Hue Mode

A) Menu:
Provides access to menu options such as General settings (Gels/Hue Mode), Reset, DMX, DMX Wireless, Camera LUT and Color Space.
Shortcut: While on control screen, press and hold for 3 seconds to switch through menus (White, Gels & Hue, RGB, CIE xy and FX).

B) Preset Buttons:
Factory defaults left to right are: 2700K, 3200K, 5000K and 6500K. G/M default value is 000. User can also use these preset buttons to store custom Kelvin between 2500K and 9900K and custom G/M, Gel, Hue and Saturation settings.

C) Display:
Provides access to Dim, Kelvin, G/M, Gel, Hue/Saturation and DMX channel. Factory reset will show: Dim = 10%, Kelvin = 2700K, G/M = 000, DMX = 001.

D) Mode:
Press to navigate from Dim to Kelvin, G/M, Gel, Hue and Saturation settings. When on the Gel function, pushing the Control knob in/out will apply the gel or remove the gel. When in sub-menus, pressing Mode always returns you to main display. When DMX is applied, use Mode to access DMX channel on main display. Shortcut Tip: Long press will bring you back one step.
A) Menu:
Provides access to menu options such as General settings (RGB Mode), Reset, DMX, DMX Wireless, Camera LUT and Color Space. Shortcut: While on control screen, press and hold for 3 seconds to switch through menus (White, Gels & Hue, RGB, CIE xy and FX).

B) Preset Buttons:
Factory defaults left to right are: 2700K, 3200K, 5000K and 6500K. G/M default value is 000. User can also use these preset buttons to store custom Kelvin between 2500K and 9900K and custom G/M, and RGB settings.

C) Display:
Provides access to Dim, Kelvin, G/M, RGB and DMX channel. Factory reset will show: Dim = 10%, Kelvin = 2700K, G/M = 000, DMX = 001.

D) Mode:
Press to navigate from Dim to Kelvin, G/M, RGB settings. When in sub-menus, pressing Mode always returns you to main display. When DMX is applied, use Mode to access DMX channel on main display. Shortcut: Long press will bring you back one step.
CIE xy Mode

A) Menu:
Provides access to menu options such as General settings (CIE xy mode), Reset, DMX, DMX Wireless, Camera LUT and Color Space. Shortcut: While on control screen, press and hold or 3 seconds to switch through menus (White, Gels & Hue, RGB, CIE xy and FX).

B) Preset Buttons:
Factory defaults left to right are: 2700K, 3200K, 5000K and 6500K. User can also use these preset buttons to store custom xy settings.

C) Display:
Provides access to Dim, CIE xy coordinates and DMX Channel. Factory reset will show: Dim = 10%, x = 0.460, y = 0.411, G/M = 000, DMX = 001.

D) Mode:
Press to navigate from Dim to xy settings. When in sub-menus, pressing Mode always returns you to main display. When DMX is applied, use Mode to access DMX channel on main display. Shortcut: Long press will bring you back one step.
FX (Effects) Mode

FX mode provides access to effects including Candle, Fire, TV, Police, Lightning, Paparazzi, Pulse and Scroll. Candle mode used as an example:

A) FX Option:
Choose the desired FX Mode by rotating the control knob. When on the desired effect, there will be several pre-programmed effects as well as control parameters that can be altered.

B) Preset Buttons:
In FX Mode, Kelvin custom settings and any control functions displayed such as Rate and Amplitude (Ampl) can be saved as a preset. Chosen values can be assigned to any preset button by holding down the desired button for 3 seconds. The Kelvin display will flash once the setting is registered.

To restore presets to default factory settings, choose Reset under General settings and Clear Presets. This method will reset all buttons in all Modes. Shortcut: If only want to clear presets for Candle Mode, hold Lock button for 3 seconds while Candle mode is displayed.

C) Mode:
Press to navigate from Dim to Kelvin and FX settings. Shortcut: Long press will bring you back one step.
The Camera LUT (Look-up Tables) feature harmonizes the Kino Flo light sources to the camera. Depending on the camera and the Kelvin setting, some differences are very subtle, while others can be more dramatic.

The corrections are applied as a CIE xy correction at each CCT (Kelvin) setting. The default setting is targeting the CIE xyz response (human eye).

Press the green menu button to the left of the display screen and scroll down to Camera LUT, then press the control knob. Menu with camera selection will be displayed. Turn the control knob and press to select camera setting:

C1 Arri Alexa  
C2 Sony Venice  
C3 Panavision DXL  
C4 Panasonic Varicam

The camera code (C1 for Arri Alexa), for example, will appear on the main menu between DIM and CCT to designate that a camera setting is active.

Note: When the controller is reset, the camera settings will go to Kino Flo Default mode.
**Color Space**

Color Space defines the RGB color space used and only affects color – not Kelvin. It is used in RGB mode and Hue Angle and Saturation. There are a few instances in the FX (Effects) mode that are also affected when color is used. The RGB color space defines the value of Red, Green, and Blue primaries (in CIE xy) and the white point is fixed at 6500 Kelvin.

Press the green menu button to the left of the display screen and scroll down to **Color Space**, then press the control knob. Menu with color selection will be displayed. Turn the control knob and press to select Color Space options:

- rec 709 / sRGB
- P3 D65
- rec 2020

The color space **rec 709 / sRGB** is commonly used on computer monitors, SDTV and HDTV television. There are slight gamma variations between rec 709 / sRGB, but not enough to separate into 2 color spaces.

The color space **P3 D65** is a common color space for digital movie projection. The color space **rec 2020** is used in ultra high definition television (UHDTV).

The color space is used when the controller is set to the RGB mode and when set to the Hue Angle/ Saturation mode.

In **RGB** mode – the color space designation will be displayed at the top of the menu. When changing the Red, Blue or Green values, the Kelvin will be locked in at 6500 for all color spaces. When the Kelvin is locked in, CCT will be displayed as CCT*.

When using Green/Magenta the CCT value is unlocked and color space selection has no impact.

In **Hue Angle/Saturation** mode – the color space designation will be displayed on the Gel line and GEL will be displayed as GEL* and CCT will be displayed as CCT*. The Color space will be displayed only when Hue Angle and Saturation are being used. When using Green/Magenta or Gel, the CCT will be unlocked and color space selection has no impact.
